

I am fortunate that I can listen to Air 1 on the net. However, not all of our people have that availability. Therefore, it is important that LPFM stations not be allowed to have priority over regular FM stations. The message sent out by Air 1 is far more important to the people of this country than anything that could be aired by LPFM stations - unless of course, these stations also chose to air the Word as well. I ask that you carefully consider the best course of action and that it take into account the damage that could be done by potentially eliminating programming that supports biblical values and family-oriented programming. Thank you for your time.
